

Expanding Livin' Merchant Capabilities in South Tangerang

Cantikaputri Febrianti

Hello!

My name is **Cantikaputri Febrianti**.

I am graduate from Bina Nusantara
University with International
Relations degree.

Chapter 1: Introduction

- The Problem & Opportunity

Problem Statement

PLATFORM OPTIMIZATION GAP

Although Livin' Merchant has reached significant milestones with 2 million users and a transaction value of IDR 8 trillion, there remains an optimization gap in the utilization of its features and integration with the local business ecosystem in South Tangerang.

1

ENHANCED FEATURES NEED

In South Tangerang, with 4,542 users out of 147,602 MSMEs, there's significant expansion potential. Current Livin' Merchant features don't fully address local MSME needs, especially in analytics, supply chain, and CRM.

2

LIMITED ECOSYSTEM INTEGRATION

Despite 97% of MSMEs adopting digital payments, a disconnect with business management tools causes operational inefficiencies, requiring multiple platforms.

3

Chapter 2: The Solution - A Scalable Digital Platform for Bank Mandiri

Solution Overview

“

Transforming Livin' Merchant into a comprehensive AI-powered business ecosystem that integrates payment processing, predictive analytics, and local supplier networks through a revolutionary 3-month free trial strategy.

3 Tier of Solution

1

Rapid AI analytics and local supplier integration for immediate SME impact.

2

Predictive inventory and business intelligence dashboards for operational optimization.

3

Multi-currency, blockchain tracking, and advanced analytics for future expansion.

Chapter 3: Go-To-Market Strategy - Launch & Growth

Go-To-Market Strategy

Launch Strategy

1. **Pilot program (Q4 2025)** in South Tangerang targeting 5,000 initial trial registrants—leveraging the existing 4,542 (approx.) merchants as early adopters.
2. **90-day trial duration** with program for onboarding, A/B testing of AI analytics features, and collection of success case studies before national expansion.
3. **Success measurement** focused on three key metrics: **sign-ups, completion rate, and conversion rate**

Distribution Channel

1. Livin' Merchant

2. Livin' by Mandiri

3. Branch office /
relationship manager

4. Local business

Go-To-Market Strategy

Adoption Strategy

01

Incentives: 0% MDR until December 2025 and 50% subscription fee discount for the first year for merchants who convert within 10 days after trial ends.

02

Partnerships: South Tangerang City Government & SME Department for digital literacy campaigns

03

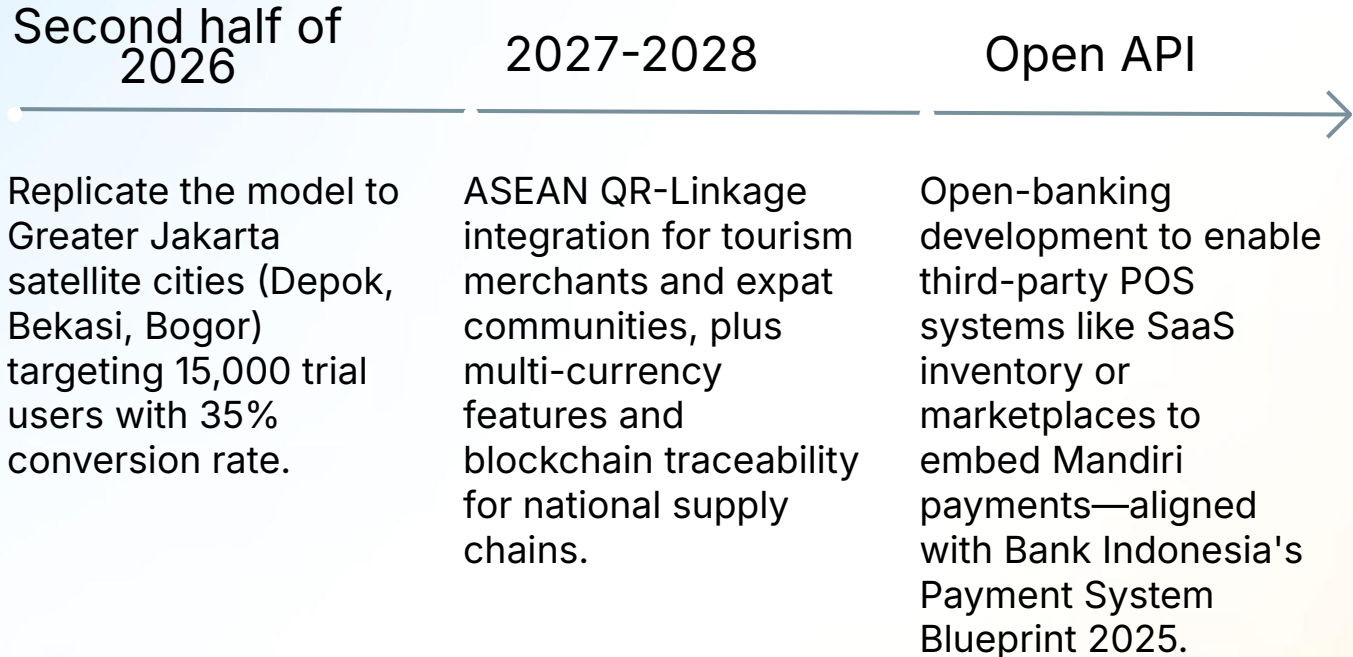

In-app gamification (Livin' Points) and referral cashback of IDR 50,000 per new merchant to drive viral loops.

03

Education: Monthly webinars "SMEs Level Up Digital", in-app e-learning modules, and modern market roadshows.

Go-To-Market Strategy

Scalability & Expansion

Chapter 4: Business Model & Revenue Streams

Business Model Canvas

Key Partners  - Local distributors & suppliers (FMCG, culinary, groceries) - Regional government (South Tangerang City Government, Cooperative & SME Office) - Bank Mandiri (core banking, lending, insurance) - Fintech & payment gateway (for QRIS & e-wallet integration) - Tech partners (AI, machine learning, API integrator, cybersecurity analyst)	Key Activities  - Development & integration of AI analytics, inventory, financing, fraud detection system - Partnership with suppliers & government - Merchant activation & digitalization education 3-month trial user nurturing & conversion - Application development and maintenance Key Resources  - Livin' Merchant platform (mobile app, backend, API) 3-month trial management system & analytics - Data analytics & AI engine (sales, inventory, QRIS fraud detection) - Mandiri branch network & relationship managers in South Tangerang - Local supplier & merchant database	Value Propositions  - Integrated Business Ecosystem: Complete end-to-end solution with 3-month free trial - Local Integration: Supplier connectivity and government services - AI-powered Growth: Data-driven insights for business expansion and optimization - Settlement 3x daily, MDR 0% until Dec 2025 - Risk Mitigation: Advanced fraud detection and security features	Customer Relationships  3-month free trial onboarding & training - Progressive feature introduction during trial - Customer support 24/7 via app & WhatsApp - Post-trial conversion support & loyalty program - Value demonstration & habit formation Channels  - Livin' Merchant mobile app with trial onboarding - WhatsApp Business API for trial support - Offline/online training during trial period - Partner distributor & marketplace integration - Community events & merchant success stories	Customer Segments  - New SME merchants (primary target) - High-volume SMEs (culinary, groceries, services) - Formal and informal SMEs - Existing Livin' Merchant merchants - Merchants in South Tangerang business centers (BSD, Bintaro)
Cost Structure  - Development of AI, inventory, financing, fraud detection features 3-month trial operational costs - Marketing & merchant acquisition - Trial user support & training - Partnership & supplier integration			Revenue Streams  - Post-trial subscription fee SaaS (Rp 75-200 thousand/month) - Transaction processing fees (0.5-0.7% MDR post-trial) - Premium analytics & business intelligence - Marketplace/supplier integration commission - Trial-to-paid conversion optimization services	

Chapter 5: Risk Assessment & Mitigation

Risk Assessment & Mitigation

Likelihood	Impact	
	Business Risks	
	Moderate	High
	Moderate	High
Likelihood	Impact	
	Moderate	High
	Moderate	High
	Moderate	High
Likelihood	Impact	
	Moderate	High
	Moderate	High
	Moderate	High

Risk	Primary Mitigation Plan
Competitive response from GoPay/Moka	Differentiation through 3-month trial + AI analytics;; Livin' Points loyalty program.
Low trial-to-paid conversion	Success-coaching, in-app + WhatsApp reminders, early-upgrade discounts, A/B pricing testing.
QRIS fraud surge	Real-time fraud engine, transaction verification education, MFA for sellers, Zero-Trust network.
Operational cost overruns	Daily cost dashboard, support automation via chatbot, strict vendor SLAs.
Supplier integration delays	Distributor SLA contracts, API sandbox, local integrator teams.

Risk Assessment & Mitigation

Likelihood	Impact		
	Regulatory Risks	Low	Moderate
	Low		BI 22/23/PBI/2020 provisions on PJP ownership & capital POJK 22/2023 violations (market-conduct, consumer data) PDP Law 2022 (server location data, DPO)
	Moderate		OJK ITSK 3/2024 sandbox compliance

Risk	Primary Mitigation Plan
POJK 22/2023 violations (market-conduct, consumer data)	Consent management implementation, literacy reports 2x/year, internal compliance audits.
OJK ITSK 3/2024 sandbox compliance	ITSK registration, security testing, AFTECH association membership, monthly reporting.
PDP Law 2022 (server location data, DPO)	On-shore data center & DR site, DPO appointment, AES-256 encryption.
BI 22/23/PBI/2020 provisions on PJP ownership & capital	Compliant shareholding structure, phased capital injection until 2026.
POJK 22/2023 violations (market-conduct, consumer data)	Consent management implementation, literacy reports 2x/year, internal compliance audits.

Risk Assessment & Mitigation

Integrated Mitigation Plan

GOVERNANCE

01

1. Digital Risk Committee led by CRO; quarterly reviews.
2. ISO 27001 and PCI-DSS for payment applications by end of 2025.

TECHNOLOGY & OPERATIONS

02

1. AI-based fraud monitoring (behavioral analytics, device fingerprinting) connected to PPATK for AML/CTF compliance.
2. Red-team penetration testing every semester; cyber-insurance coverage limit of IDR 50 billion.

ECOSYSTEM & EDUCATION

03

1. "Check QRIS Before Scanning" campaign with Bank Indonesia and Ministry of Communication; educational video content for merchants.
2. Data literacy program – workshops for small merchants, modules in Livin' Merchant Academy.

FINANCIAL BUFFER

04

Risk reserve of IDR 40 billion (5% of project cost).

Chapter 6: Financial Feasibility & Pricing Strategy

Financial Feasibility & Pricing Strategy

Investment Breakdown

Component	Amount (Rp)	Notes
Development Costs	420,000,000	Fintech application development
- Tier 1 (AI Analytics & Local Supplier)	126,000,000	Quick wins implementation
- Tier 2 (Predictive Inventory & BI Dashboard)	210,000,000	Strategic value features
- Tier 3 (Multi-currency, Blockchain, Advanced Analytics)	0 (Future Phase)	Advanced innovation - Phase 2
- Security Enhancement (QRIS Fraud Detection)	84,000,000	Real-time fraud monitoring
Operational Costs	350,000,000	Market-adjusted for Indonesia
- 3-month Trial Program	145,000,000	User onboarding & conversion
- Marketing & User Acquisition	130,000,000	Digital marketing campaigns
- Customer Support & Training	75,000,000	Success coaches & 24/7 support
Total Investment	770,000,000	Complete project delivery

Key Takeaway

54% allocated to fintech development (AI analytics, blockchain, fraud detection) and **46% to operations** (trial programs, marketing, support). Investment structured for phased implementation with focus on Indonesian market conditions and quick wins strategy.

Financial Feasibility & Pricing Strategy

Revenue Strategy

Revenue Component	Target Scenario (Annual)	Monthly Average	Growth Driver
Trial Users Acquired	10,000 users	833 users/month	Extended MDR 0% + 3-month trial
Conversion Rate	25%	-	Industry benchmark for 3-month trials
Paying Subscribers	3,000 users	250 new/month	Progressive value demonstration
SaaS Platform Revenue	Rp 1,080,000,000	Rp 90,000,000	Avg Rp 30,000/user/month comprehensive platform
Transaction Processing Revenue	Rp 1,080,000,000	Rp 90,000,000	0.6% average MDR post-trial
Premium Analytics Revenue	Rp 432,000,000	Rp 36,000,000	40% adoption Rp 30,000/month advanced features
Partnership Revenue	Rp 180,000,000	Rp 15,000,000	Supplier integration fees
TOTAL TARGET REVENUE	Rp 2,772,000,000	Rp 231,000,000	Comprehensive ecosystem

Key Takeaway

Diversified income from SaaS platform, transaction processing, premium analytics, and partnerships. Target 10,000 trial users with 25% conversion rate, achieving 3,000 paying subscribers at Rp 30,000/user/month average revenue.

Financial Feasibility & Pricing Strategy

Break-Even Analysis

Financial Metric	Target	Calculation	Timeline
Total Investment	Rp770,000,000	–	Year 0
Annual Revenue	Rp2,772,000,000	–	Year 1
Monthly Revenue	Rp231,000,000	Annual/12	Ongoing
Break Even Point	2.9 months	$\text{Rp770M} \div \text{Rp231M}$	Q1 Year 1
ROI Timeline	3.2 months	incl. operational costs	Q1 Year 1
Annual Profit Margin	75.5%	$(2.772 - 0.770) / 2.772$	Year 1

Key Takeaway

Break-even achieved in 2.9 months with 3.2-month ROI timeline. 75.5% profit margin exceeds industry benchmarks. Monthly revenue requirement of Rp 231 million demonstrates strong financial viability and capital efficiency.

Market Viability Analysis

Free MDR Program dan Free Trial Advantage

The 0% MDR program extended until December 31, 2025, combined with a 3-month trial, offers a significant competitive advantage. With 2 million national merchants and a 3.08% penetration, Livin' Merchant has demonstrated a strong product-market fit.

Digital Payment Ecosystem Growth

QRIS transactions have grown 217.33% YoY, reaching 55 million users nationwide. Since December 1, 2024, Bank Indonesia has implemented a 0% MDR for micro-businesses on transactions up to IDR 500,000, further boosting digital payment adoption among MSMEs.

Market Viability Analysis

Competitive Advantage Analysis

Aspek Perbandingan	Livin' Merchant (Enhanced)	GoPay Merchant	BCA Merchant	BNI Merchant	BRI Merchant	Moka POS
Trial Period	3 months free	No trial	No trial	No trial	No trial	14 days free
Business Analytics	AI-powered forecasting	Basic reporting	Real-time reports	Basic reports	Detail monitoring	Advanced analytics
Financial Services	Instant loan + insurance	GoPay Pinjam	Banking integration	Banking integration	Banking integration	Capital access
Local Integration	Supplier network Tangsel	Limited	Limited	Limited	Limited	Limited

Chapter 7: Prototype - Demonstrating the Solution

Prototype Section

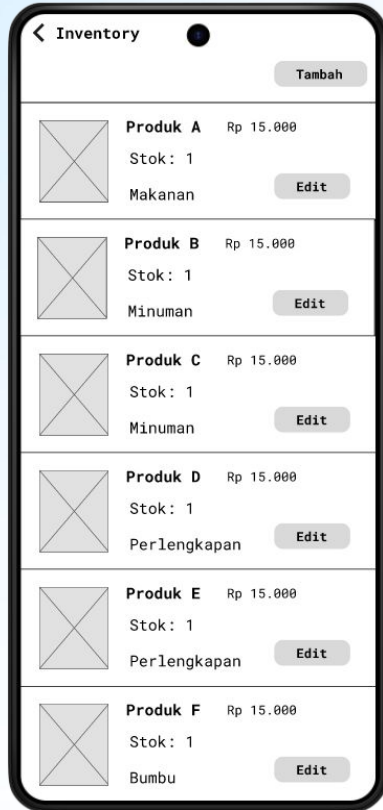

The merchant homepage displays the profile, location, Livin' Point, quick access to the main menu, and notifications.

Key Features:

- Quick access: Orders, Cashier, Reports, AI Analytics
- Latest revenue
- Trial countdown
- Merchant information

Access the prototype [here](#)

Prototype Section

Displays of product list, stock, and AI-powered auto-reorder feature to simplify stock management and prevent stockouts.

Key Features:

- Product & stock list
- Automatic reorder recommendations
- Low stock alerts

Access the prototype [here](#)

Prototype Section

The suspicious activity detection page monitors QRIS payments to protect merchants from fraudulent transactions and offer alternative payment methods.

Key Features:

- Fraud alert visuals
- Payment status
- Payment method alternatives (EDC, Cash, Tap-to-Pay)

Access the prototype [here](#)

Prototype Section

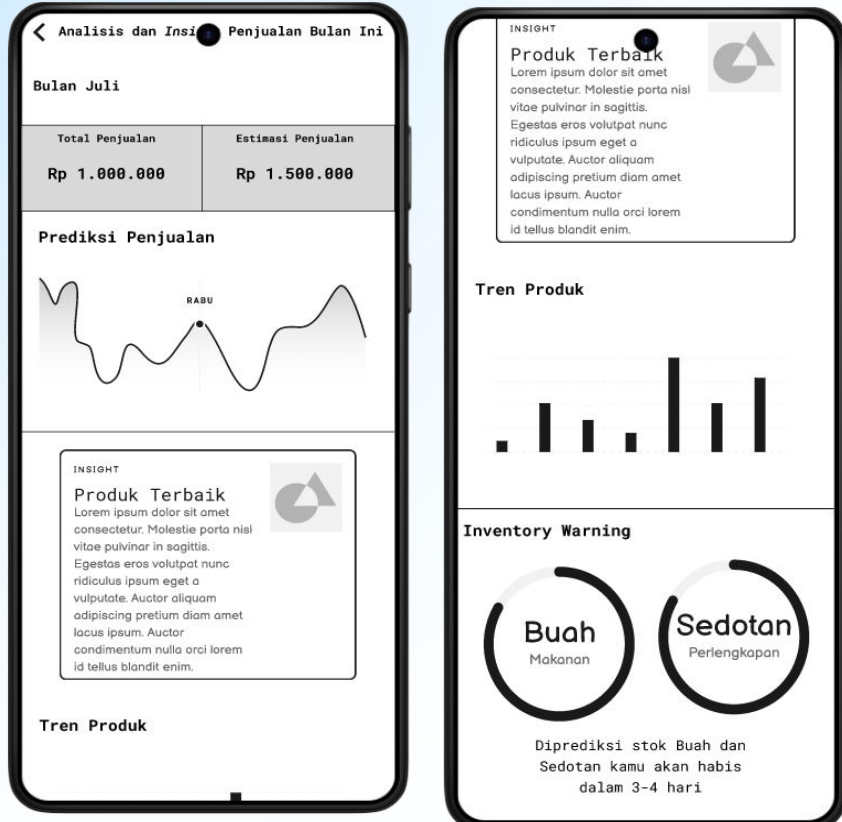

The subscription package selection screen after the trial ends, with a feature comparison table to help merchants choose the package that best suits their needs and understand the differences between each tier.

Key Features:

- Package options (Basic, Business, Enterprise)
- Key feature comparison table
- Select package button

Access the prototype [here](#)

Prototype Section

A monthly sales insight dashboard with predictions, product insights, trends, and inventory warnings to provide data-driven insights for better and more proactive business decision-making.

Key Features:

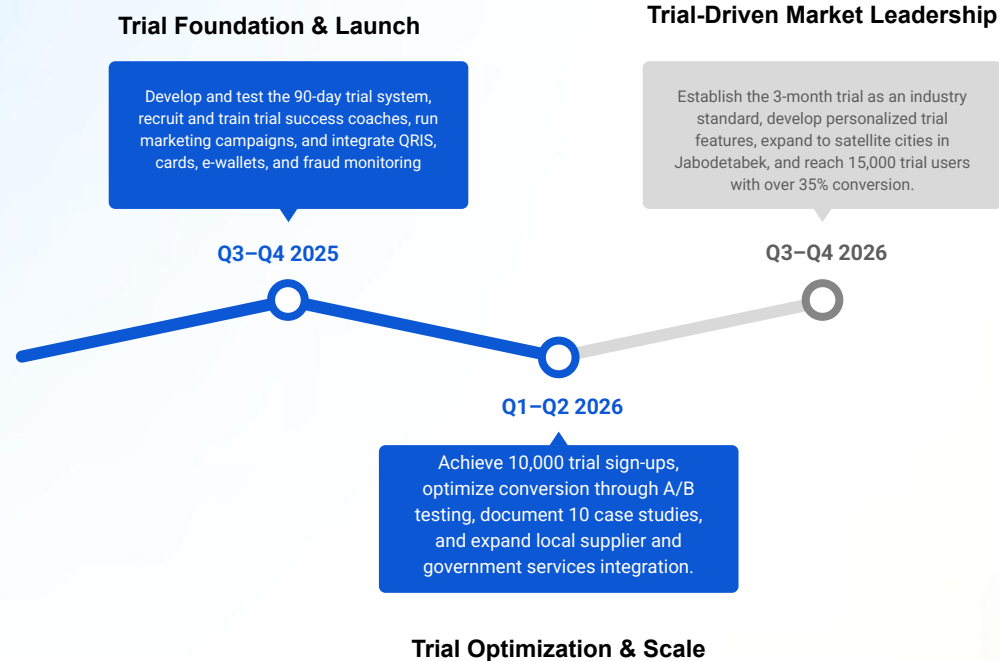

- Sales summary & estimates
- Product prediction & trend graphs
- AI insights & inventory warnings

Access the prototype [here](#)

Final Recommendation

Final Recommendations & Next Steps

Final Recommendations & Next Steps

Success Metrics & KPIs - Target Scenario Focus

KPI Metric	6 Months Target	12 Months Target	24 Months Target
Trial Sign-ups	5.000 users	10.000 users	15.000 users
Trial Completion Rate	75%	80%	85%
Trial-to-Paid Conversion	30%	30%	35%
Active Paying Users	1.500 merchants	3.000 merchants	5.000 merchants
Monthly Revenue	Rp 115,5 M	Rp 231 M	Rp 433,5 M
Transaction Volume Growth	Rp 45 B	Rp 90 B	Rp 150 B
Analytics Adoption Rate	80%	85%	90%
Supplier Integration Success	150 suppliers	300 suppliers	450 suppliers
Break-Even Achievement	Month 3	Sustained Profit	Market Leadership
